

Job Announcement

Job Title: Rehabilitation Instructor of Adaptive and Assistive Technologies for Blindness and Low Vision Accessibility

Classification: Full-Time, Exempt

Purpose

The purpose of this role is to provide hands-on training to adults with vision loss to maintain independence using computers, mobile devices, and other technology related products.

Primary Responsibilities

Assess clients' competencies along with the equipment to best meet their needs.

Plan training and track progress for achieving personal or professional technology goals.

Setup, configure, and teach adaptive and assistive software and technology basics, including troubleshooting and maintenance to clients.

Work independently with the ability to prioritize client success as the leading goal, while also being able to collaborate with other instructors and staff.

Provide Instruction in both San Diego and Vista Campuses.

Qualifications

Master's degree in Vision Rehabilitation Technology preferred, or a bachelor's degree with additional certification, such as Assistive Technology or Vision Rehabilitation Specialist.

Two years of training or instructing experience that demonstrates knowledge, skills, and abilities with adult teaching and learning methods of groups and individuals with vision loss.

Demonstrated experience training, coaching, or consulting adults who are blind or visually impaired in technological, vocational, or rehabilitative programs.

Demonstrated experience with adaptive and assistive vision technologies, including installations, configurations, settings, customizations, and troubleshooting hardware, software, mobile devices, and other products to include, but not be limited to:

Demonstrable working knowledge of adaptive screen readers and magnifiers for operating systems, software, apps, peripheral equipment, and accessories on mobile devices and computers, refreshable Braille displays, Victor Reader Stream, Trek, and other related products.
